

YESHURUN SECURITY REPORT

Since the Shul has re opened, security is now fully operational, we have three new CST trained security officers whom have joined our team which takes us up to 8.

Thank G-D we haven't had any major incidents in the past 18 months, there have been a few minor incidents which have been dealt with with utmost professionalism from our security team. Costa is now the lead guard during the week as well, he is devoted and caring and is really good for our site.

The volunteer rota is working well, Thank you to all those who have helped since we restarted, We are still missing approximately 15-20 people from the teams rotas, this would take us to two per shift, which would mean the security officer on duty would have some support knowing who is from the community or not.

The CCTV system is quite old and has a lot of blind spots as well as being quite unclear, the CST have kindly agreed to fund 50% of the project, this would be security goal for 2023.

Kind regards

Menachem Rabin

Yeshurun Security Team
